Introduction

About Me

9x generation / Software Engineer / UX - UI Developer

Hi, thank you for taking a look at my profile. My name is Tuan, BOM as the nickname. With the very high patience in my personality, I would like to approach the new technical skill, finding a challenge, and all I need is the keyword. I really like to have independence in knowledge thinking. That is the only way that can make become confident and make decisions inside a lot of considering deals. Not just the developed function, I would like to do the things that have a creative idea function and that can really make the profit to the production. That is the way can give the motivation for performance working.

Having designing and programming skills is the very advantage of supporting each other. I always want to improve both of them better and better day by day.

The environment working also important to me, the huge part of the quality of the working process will depend on that. Finding a kind environment is will be good for me.

Experiences & S...

2015 - present: Macromill South East Asia

Projects

Vinaresearch's mobile app

Nusaresearch's mobile app

Yimresearch's mobile app

Achievement skills

Android

60%

Java

iOS

65%

Swift

Key achievement

Gained some development skills and knowledge for mobile development:

- Integrate the analytics library to get the situation application's traffic, session start, Crash-free statistics.
- Intergrate the campaign the application to increase the visited user every day.

Programing stuff

Description

- After researching Flutter technology, I want to do the "Hello world" beginning application of mine with Flutter.
- Trying to approach with the new challenge, like as I try to gain a better chance for myseft.

Projects

NuCatch - Small brain game

NuCatch is a small brain game, it can help to improve a little bit refresh your memory by catching the number in a very short time. It can help you to face the remember OTP number, remember your partner's number, their birthday... in a very short time. Let's enjoy!

Download and preview for Android, let take a look!

*It has been developed for both IOS and Android by **Flutter**, they will be on Apple Store in the near future.*

Achievement skills

Key achievement

Beginning and the first project that I using Flutter to develop.

- It has a ton of great benefits, if you want an application that can work perfectly on multiple platforms.
- For Android and IOS, Flutter adapts around 85% (I estimated), some special config it needs to handle manually for each OS.

I thought the Flutter developer having the basic knowledge in Android and IOS development will have a big advance to approach Flutter.

Freelancer designer
